Challenges

The use of shared resources should be coordinated organisation-wide. To ensure all employees can access the resources they need at all times, they need to keep track of availability.
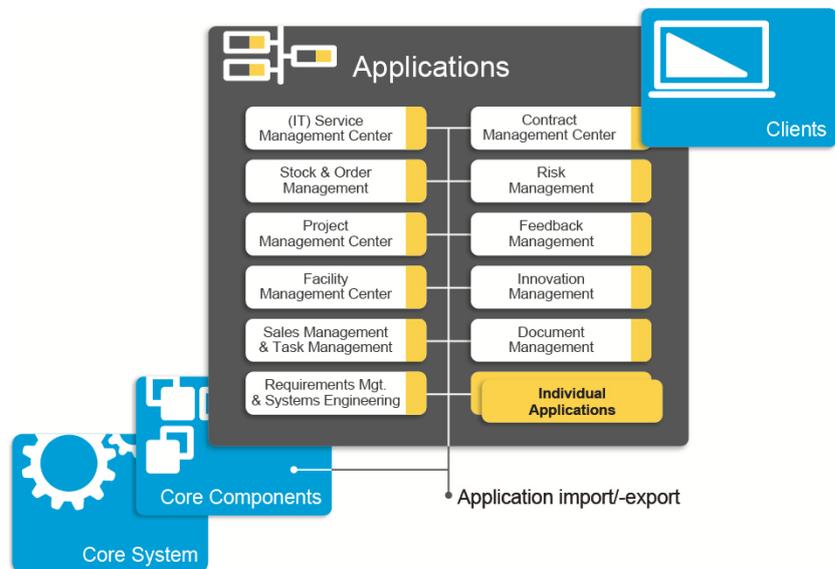

Central resource management

Access to central resource management allows all employees to check the availability of specific resources and book the resources they require.

How can OMNITRACKER help you?

OMNITRACKER Booking Schedule allows you to plan all resources organisation-wide. You can also process bookings regardless of your location using the OMNITRACKER Web Client.

With OMNITRACKER you can represent, monitor and optimise all your business processes. You can use the mature OMNITRACKER applications directly or flexibly define your own processes.
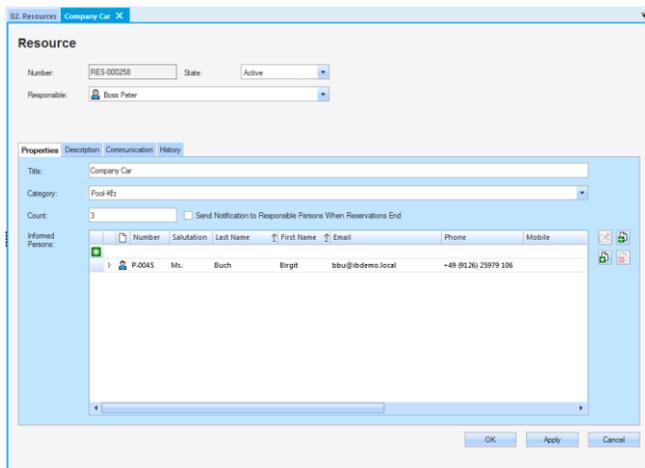

Hard to believe? Let us prove it!

Booking Schedule

OMNITRACKER Booking Schedule allows you to manage all company resources centrally. It allows all employees to book necessary resources without overlap.
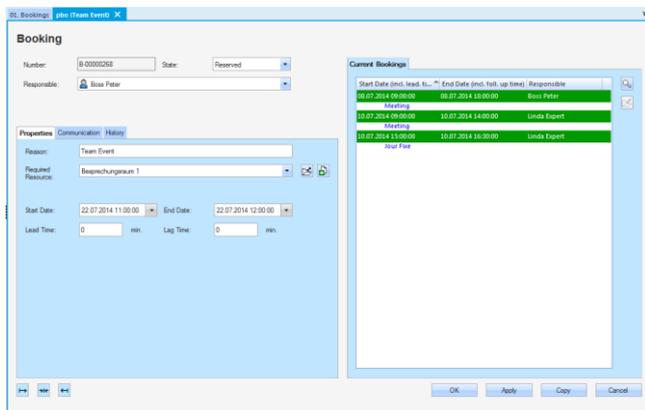

The application can be used for bookings of all resource types, for example:

- Rooms
- Vehicles
- Work materials

Define your own resources and categories.

You can define your own categories to structure your resources. You can define how many instances of each resource are available, so that only one entry needs to be created for identical resources. This ensures that only the defined number of simultaneous bookings are possible.

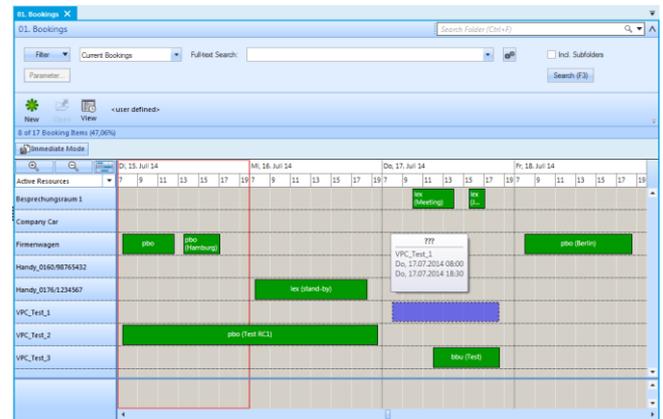

A display of current bookings makes planning even easier.

Easy booking

OMNITRACKER Booking Schedule allows you to book resources very easily, e.g. by drawing a bar for the required resource in the time line view with your mouse. A booking form opens, with the resource and

the time already entered. Changes can me made later either by editing the booking form, or by simply dragging with the mouse.

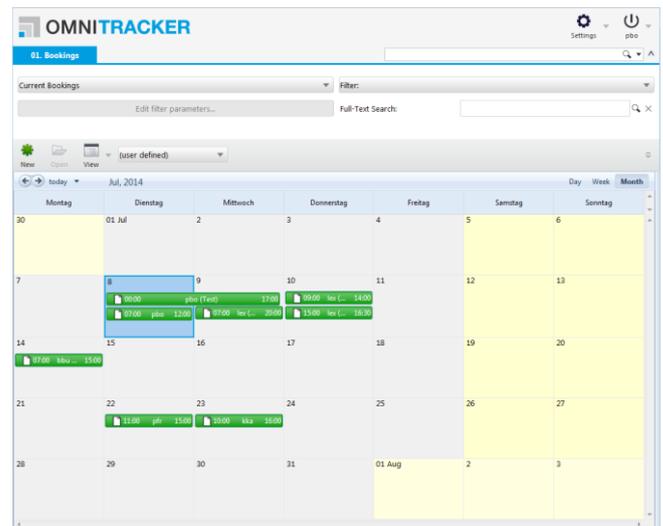

The clearly structured time line view allows you to plan allocations easily by drag&drop.

OMNITRACKER Booking Schedule offers you mobility by letting you conveniently book resources and retrieve booking information through the OMNITRACKER Web Client.

Clearly structured views

The time line view and the calendar view provide a quick overview of bookings made for individual resources.

The calendar view in the web client provides a good overview of allocations.
