OMNILYTICS Modeler

The fundamental BI modeling tool

Your benefits

- ✓ Individual display options even for complex BI models
- ✓ Define all reporting and analysis parameters individually
- ✓ Central and standardized modeling for all data formats and sources
- ✓ Quick modeling of requirements through DAX libraries and DAX editor
- ✓ Internationally applicable thanks to multilingual dashboards
- ✓ Connect your own software systems and data sources to OMNILYTICS with connectors
- ✓ Versioned documentation as secure proof

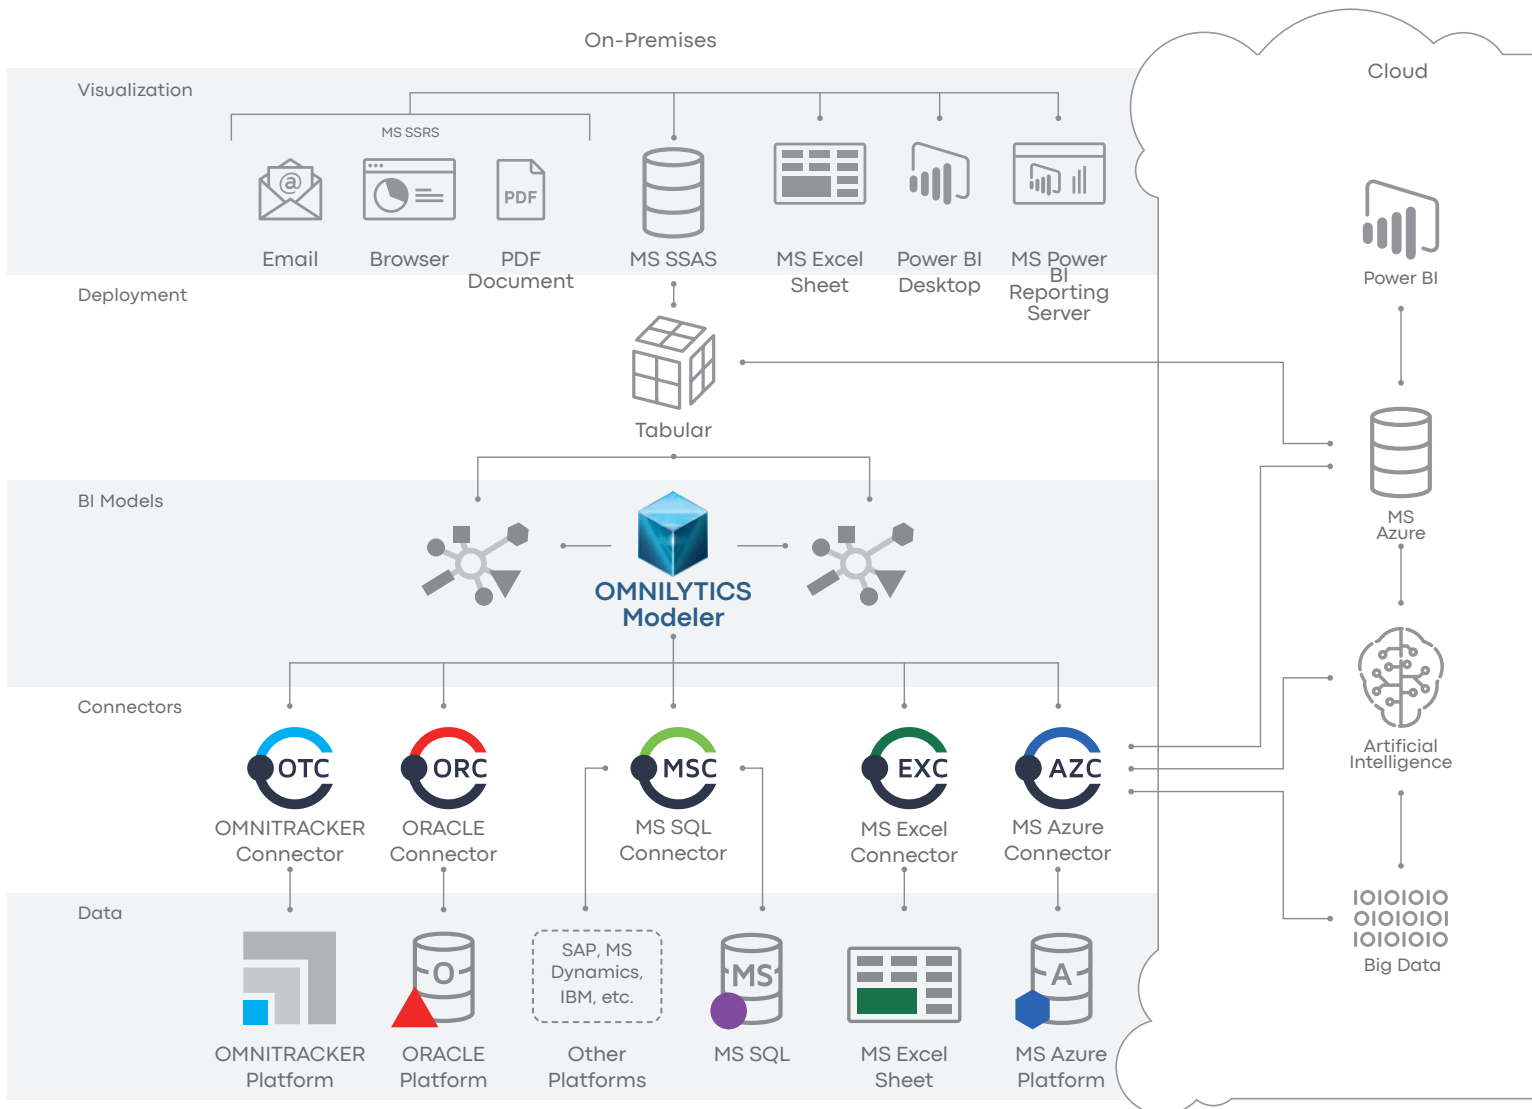

Modeling data efficiently

Data volume, frequency and number of data sources are continuously increasing in the "Big Data" age. Transparent BI models form the basis of all development steps and are therefore of fundamental importance for the success of your business analysis.

OMNILYTICS Modeler is the modeling tool for your smart Business Intelligence solution. The connectors used in OMNILYTICS allow reliable integration of your data into the BI tools of the market leader Microsoft®.

The holistic target of the BI solution OMNILYTICS is to make faster and better management decisions, to identify risks and trends at an early stage and to make the best possible use of potentials.

Databased decisions

• MS... Microsoft • MS SSAS... Microsoft SQL Server Analysis Services • MS SSRS... Microsoft SQL Server Reporting Services

Foundation for all analyses: the OMNILYTICS Modeler

The intuitive OMNILYTICS Modeler allows the simple and clear creation of data models. Well-planned and sensibly structured data modeling is a prerequisite for all subsequent work steps of your analytics projects, including visual preparation.

Use the OMNILYTICS Modeler for:

- an effective modeling of your data.
- a variable translation of the analysis model contents into different languages.
- a verifiable, versioned documentation.

Perfect interaction: OMNITRACKER & OMNILYTICS

With OMNILYTICS, you get a smart Business Intelligence solution for the early identification of optimization potential in all business areas and organizational units. All OMNILYTICS modules are integrated into the OMNITRACKER process platform so that you can evaluate and visually prepare the KPIs of your central database directly in OMNITRACKER.

Integrate components from third-party systems thanks to connectors and benefit from OMNILYTICS as a comprehensive, standardized BI solution. With Microsoft® technology, present your models as customizable dashboards, reports and in other output formats.

Big data becomes smart data

With a well-thought-out Business Intelligence solution, you gain decisive competitive advantages. You recognize weak points in your workflows quicker, and you are able to respond to market trends in a timely manner.

The initial analysis of your workflow architecture forms the foundation of a goal-oriented Business Intelligence strategy. You will only profit optimally if you can visualize and evaluate the most relevant data out of the mass of your data.

We would be pleased to support you in all phases of your Business Intelligence implementation: from business analysis and preparation of the specification via modeling and implementation up to evaluation and optimization of your BI models.

Features of the OMNILYTICS Modeler

Adapt the appearance settings of your BI models at any time and independently

Intuitive modeling tool with reusable templates and out-of-the-box models

Location-independent access to the latest analyses of your company data

Central database for all evaluations with optional data warehouse

Integration of existing BI structures into OMNITRACKER

Thanks to high scalability—possibility of data mining and predictive analysis

Independent solutions

For companies of the SME sector to global players: We support all enterprises in the digitization and automation of IT and non-IT services. OMNITRACKER is used in all industries and company sizes. Thanks to our experience and flexibility, we serve all branches as well as niche sectors with individual solutions.

More services

Our consulting experts advise you on the development and implementation of your digital projects. As a reliable software partner, we have accompanied thousands of software projects in over 750 live systems. With this extensive experience and know-how, we support you in all phases: from requirement analysis and implementation to system migrations and workflow optimization —always with assistance of our technical support. Our trainings for end users, administrators and customizing trainings as well as web-based seminars complete the OMNINET service portfolio.

About OMNINET

OMNINET, headquartered in Eckental near Nuremberg, Germany, and with other national branches and international subsidiaries, is one of the market leaders in the field of business process software, especially in the field of IT and enterprise service management. The product portfolio ranges from a highly flexible platform for the digitization and automation of business processes to BI tools and cloud-based service management solutions.

OMNINET is certified to ISO standard and has been delivering certified and award-winning software products for 25 years—100% made in Germany. OMNITRACKER is the industry-independent software solution for an ITIL®4- and GDPR-compliant implementation of individual digitization strategies.
