## General Notes

OMNINET makes no warranty, implied or otherwise, about the performance or reliability of the mentioned third-party products. Existing older versions of the products listed are out of support even though these older versions are not in the list.

## End-of-Support Dates

OMNINET technical support will no longer provide support for the following third-party products if the indicated end-of-support date is reached. This document lists the end-of-support dates of the mainly used third-party-products. Only the last version for which support has expired of a specific product listed and marked by bold characters. Older versions (also no longer supported) are not listed.

OMNITRACKER versions published after an end-of-support date are not tested with the expired third-party product versions.

Product	End-Of-Support Date
baramundi Management Suite	
The two most recently released main releases are always supported. Baramundi releases two versions annually, e.g. 2018 R1 in May and 2018 R2 in December. This means that version 2017 R2 dropped out of support when version 2018 R2 was released.
